DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Geddes et al. (US Patent No. 5,560,945).

Regarding claims 1 and 2, it is noted that Geddes et al. discloses an envelope (Fig. 2), comprising an inner absorbent layer made, a middle layer made of water resistant material, and an outer layer made of writable material (column 6, lines 52-55). The initial statement of intended use and all other functional implications have been carefully considered but are deemed not to impose any patentably distinguishing structure over that disclosed by Geddes which is capable of being used in the intended manner, i.e., envelope to hold a recording liquid cartridge with an inner absorbent layer capable of absorbing recording liquid (see M.P.E.P. 2111).

Regarding claim 3, it is noted that Geddes et al. discloses an envelope (Fig. 2), comprising a main body of the envelope, and a foldable sealing portion (area near 2C, 2E) capable of sealing an opening of the envelope by folding at a reference line, wherein a portion of the main body is extended over the reference lines at both sides of the sealing portion (part of main body near 2E).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Abasolo et al. (US Patent No. 6,588,586 B2) discloses an envelope with an absorbent and an impermeable layer. Tucker et al. (US Patent No. 6,182,886 B1) discloses an envelope with an absorbent filler inside. Broun et al. (US Patent No. 5,431,970) discloses an envelope with an absorbent and an impermeable layer. Ikegami et al. (US Patent No. 5,376,392) discloses an envelope with an absorbent and an impermeable layer. Akahori et al. (US Patent No. 5,310,587) discloses an envelope with an absorbent and an impermeable layer. Russo et al. (US Patent No. 5,199,795) discloses an envelope with an absorbent and an impermeable layer. Bunker et al. (US Patent No. 5,128,182) discloses an envelope with an absorbent and an impermeable layer. Caggiano (US Patent No. 4,861,632) discloses an envelope with an absorbent and an impermeable layer. Barner (US Patent No. 4,629,064) discloses an envelope with an absorbent and an impermeable layer.
